

Grapevine World is a decentralized, borderless ecosystem for the seamless exchange of health data in a standardized, secure manner.

Populated with every stakeholder in health – from patients to pharma, care providers to payors, researchers and technologists – Grapevine World is the backbone to a new global market.

**// 1 MARKET PROVEN, STANDARDS BASED INTEROPERABILITY (IHE)**

**// 2 BLOCKCHAIN TECHNOLOGY**

DATA EXCHANGE & UTILIZATION

ALL MARKET PLAYERS

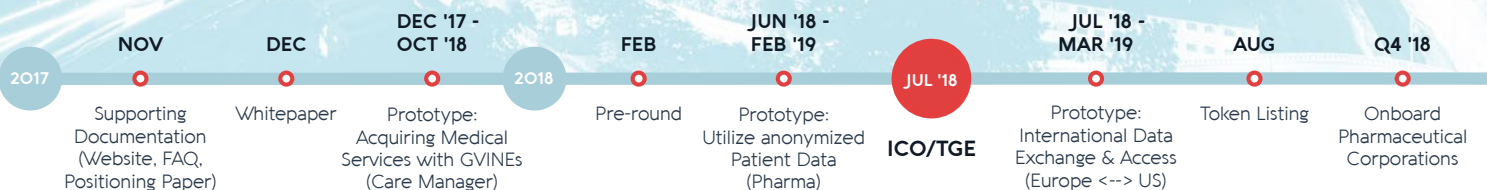

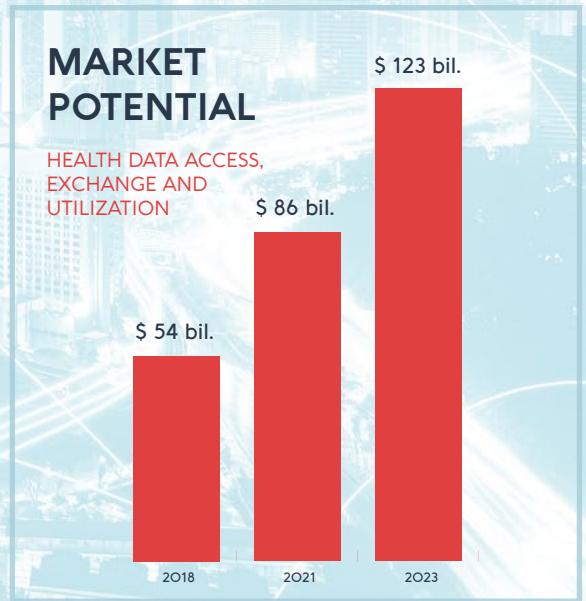

NEW GLOBAL HEALTH ECONOMY

**THE GRAPEVINE WORLD TOKEN: GVINE**

GVINEs make the Grapevine World go round:

- Patients receive GVINEs for providing informed consent to share their anonymized data.
- GVINEs pay for health data, products and services (B2C/B2B).
- All transactions are processed by and logged in the blockchain, maintaining a complete record for both accounting and provenance.
- GVINEs are stored in a decentralized blockchain.

**KEY BENEFIT 1: CONTROL YOUR HEALTH DATA**

Individuals gain complete control over their data: able to access it anywhere in the world, at any time, with absolute authority over whom it's shared with – receiving GVINEs every time they share information.

**KEY BENEFIT 2: BIG HEALTH DATA: ACCESS AND USE**

Organizations gain access to previously unavailable data, with the authorization to use it for research, education, clinical studies, fitness reward programs and any other conceivable health project – ultimately improving healthcare for all.

**KEY BENEFIT 3: A NEW HEALTH ECONOMY**

With Grapevine tokens, you can buy existing and future healthcare services and products, including expert consultation, ongoing care, fitness apps, gadgets and more health-related services. Patients gain access to new options in healthcare.
